Applied Mathematics Letters

Managing Editor

Ervin Y. Rodin

Editorial Assistant

Kathryn A. Schallert

Department of Systems Science and Mathematics

Box 1040, Washington University

St Louis, MO 63130, U.S.A.

Tel.: 314-889-6007 or 889-5806

E-mail: rodin@rodin.wustl.edu

an international journal of rapid publication

Publishing Office

Journals Production Unit, Pergamon Press plc,
Hennock Road, Marsh Barton, Exeter, Devon
EX2 8NE, England [Tel. (0392) 51558; Fax
425370].

Advertising and Subscription Offices

North America: Pergamon Press Inc., Fairview
Park, Elmsford, NY 10523, U.S.A.

Rest of the World: Pergamon Press plc,
Headington Hill Hall, Oxford OX3 0BW,
England [Tel. (0865) 794141; Fax 60285].

Annual Subscription Rates 1991

Annual institutional subscription rate, DM
440.00; 2-year institutional subscription rate,
DM 836.00 (including postage and insurance).
A personal subscription rate for those whose
library subscribes at the regular rate is available
on request. All prices subject to amendment
without notice. *Note:* frequency changes to 6
issues/annum in 1991.

Back issues

Back issues of all previously published volumes,
in both hard copy and on microform, are avail-
able direct from Pergamon Press offices.

Published Quarterly

Copyright © 1990 Pergamon Press plc

It is a condition of publication that manuscripts
submitted to this journal have not been pub-
lished and will not be simultaneously submitted
or published elsewhere. By submitting a manu-
script the authors agree that the copyright for
their article is transferred to the publisher if and
when the article is accepted for publication.
However, assignment of copyright is not re-
quired from authors who work for organizations

which do not permit such assignment. The
copyright covers the exclusive rights to repro-
duce and distribute the article, including
reprints, photographic reproductions, microform
or any other reproductions of similar nature and
translations. No part of this publication may
be reproduced, stored in a retrieval system or
transmitted in any form or by any means, elec-
tronic, electrostatic, magnetic tape, mechanical,
photocopying, recording or otherwise, without
permission in writing from the copyright holder.

PHOTOCOPYING INFORMATION FOR USERS IN THE U.S.A.

The Item-fee Code for this publication indicates that
authorization to photocopy items for internal or per-
sonal use is granted by the copyright holder for
libraries and other users registered with the Copyright
Clearance Center (CCC) Transactional Reporting
Service provided the stated fee for copying beyond
that permitted by Section 107 or 108 of the U.S.
Copyright Law is paid. The appropriate remittance of
\$3.00 per copy per article is paid directly to the
Copyright Clearance Center Inc., 27 Congress Street,
Salem, MA 01970, U.S.A.

Permission for other use. The copyright owner's con-
sent does not extend to copying for general distri-
bution, for promotion, for creating new works, or for
resale. Specific written permission must be obtained
from the publisher for such copying.

In order to make this issue/volume available as econ-
omically and as rapidly as possible, the authors' type-
scripts have been reproduced in either their original or
reprocessed T_EX format. The authors/Technological
Associates are fully responsible for the quality and
content of the text.

The Item-fee Code for this publication is:
0893-9659/90 \$3.00 + 0.00

minimum requirements of American National Stan-
dard for Information Sciences—Permanence of Paper
for Printed Library Materials, ANSI Z39.48-1984.

List of Contents

NUMBER 1

P. Bernhard and J. Shinar	1	On finite approximation of a game solution with mixed strategies
A. Eden, B. Michaux and J.M. Rakotoson	5	Some results on doubly nonlinear parabolic equations as dynamical systems
L. Jódar	9	Analytic solution for a class of discrete-time Riccati equations arising in Nash games
L. Jódar and E. Navarro	15	On complete sets of solutions for polynomial matrix equations
R.N. Kalia and S. Keith	19	Fractional calculus and expansions of incomplete gamma functions
K. Kitahara	23	A note on approximation by step functions
S.A. Maggelakis and J.A. Adam	27	Note on a diffusion model of tissue growth
B.N. Mandal and P.K. Kundu	33	Incoming water waves against a vertical cliff
M. Nunokawa, S. Owa and H. Saitoh	37	On the rate of change of $\arg df(z)$ and $\arg f(z)$
S. Owa, M. Obradovic and M. Nunokawa	41	On certain analytic functions and subordinations
B. Pourbabai	47	A Markovian queueing transportation network problem
R. Quintana Jr	51	Manifolds in the Schwarzschild and Kerr metrics
R. Racke	53	A unique continuation principle and weak asymptotic behavior of solutions to semilinear wave equations in exterior domains
A.G. Ramm	57	Property C and uniqueness theorems for multidimensional inverse spectral problems
A.G. Ramm	61	Algorithmically verifiable characterization of the class of scattering amplitudes for small potentials
D.C. Sanyal and S.K. Samanta	67	Hydromagnetic flow of a rarefied gas in a horizontal channel with volume sources or sinks of mass

R. Srivastava	71	A theorem on generating functions and its applications
B. Fuchssteiner and G. Oevel	75	Action-angle representation of multisolitons
C. Jeffries	79	Dense memory with high order neural networks
C. McCrosky and D. Dutta	83	A type-theoretic semantics of arrays
I.E. Schochetman	89	Pointwise versions of the maximum theorem with applications in optimization
T. Strzalkowski	93	An algorithm for inversing a unification parser into an efficient generator
A. Tornambe	97	Use of high-gain observers in the inverse kinematic problem
	i	Instructions for authors
	iii	Sample pages for authors

NUMBER 2

K.E. Ahmad and N.S. Abd El-Hakim	1	The identifiability of finite mixing of some noncentral distributions
I.K. Argyros	5	Some projection methods for the approximation of implicit functions
N. Balakrishnan	9	Modified Vogel's approximation method for the unbalanced transportation problem
LL.G. Chambers	13	Special integrals of the Hamilton-Jacobi equation
U.J. Choi and D.Y. Kwak	17	Almost sure convergence of a finite element approximations for the random Sturm-Liouville boundary value problem
C. Constanda	21	Complete systems of functions for the exterior Dirichlet and Neumann problems in the bending of Mindlin-type plates
T.K. DeLillo	25	A note on Rengel's inequality and the crowding phenomenon in conformal mapping
A.W.M. Dress and W. Wenzel	29	Matroidizing set systems: A new approach to matroid theory

A.W.M. Dress and W. Wenzel	33	Valuated matroids: A new look at the greedy algorithm
D. Dubois and H. Prade	37	Scalar evaluations of fuzzy sets: Overview and applications
K. Farahmand	43	Random polynomials
F. Flandoli	47	A counterexample in the boundary control of parabolic systems
L. Jódar and J.L. Morera	51	Singular perturbations for systems of difference equations
O. Kaleva	55	The calculus of fuzzy valued functions
J. Langer and R. Perline	61	The Hasimoto transformation and integrable flows on curves
E.B. Lin and M.Y. Chou	65	Optimal contracts
G. Mehta	69	Maximal elements of condensing preference maps
M.A. Noor	73	Mixed variational inequalities
R. Ravindran and P. Prasad	77	A new theory of shock dynamics, Part I: Analytic considerations
D. Rolling and L. Debnath	83	The Cauchy-Poisson waves in an inviscid rotating stratified liquid
M. Spivack	87	Operator splitting for the random wave moment equations
R.P. Tewarson, S. Kim and J.L. Stephenson	93	Using quasi-Newton methods for kidney modeling equations
L. Xu-Duan and C. Chang-nian	97	Classes of GSFR sequences and their fast generation

i Instructions to authors

iii Sample pages for authors

NUMBER 3

K. E. Ahmad and N.S. Abd El-Hakim	1	Random sampling from a truncated bivariate normal distribution
R. Ahlswede	5	Coding for channels with localized errors: the non-binary cases

A. Ambrosetti, M. Calahorrano and F. Dobarro	9	Remarks on the Grad-Shafranov equation
J. Barhen, N. Toomarian and S. Gulati	13	Application of adjoint operators to neural learning
B. Codenotti	19	Parallel solution of linear systems by repeated squaring
V. Dahl and P. Massicotte	21	Interpreting static discontinuity grammars in Prolog
P. Degond and P.A. Markowich	25	A one-dimensional steady-state hydrodynamic model for semiconductors
A. Eden, B. Michaux and J.M. Rakotoson	31	Error analysis of nonlinear evolution equations and associated dynamical systems
B.R. Feiring	35	A quadratic programming view of the linear complementary problem
D. Funaro	39	Inverse inequalities for Chebyshev approximations in L^∞ norms
A.L. Gorin, L. Auslander and A. Silberger	43	Balanced computation of two-dimensional transforms on a tree machine
T.A. Gulliver and V.K. Bhargava	47	Some properties of self-reciprocal polynomials
K.H. Höffmann, P. Sibani, J.M. Pedersen and P. Salamon	53	Optimal ensemble size for parallel implementations of simulated annealing
J.-Q. Hu	57	Steady-state sample path derivative estimators
L. Jódar and J.L. Morera	61	Singular perturbations for systems of second order difference equations
C.-H. Huang, J.R. Johnson and R.W. Johnson	67	A tensor product formulation of Strassen's matrix multiplication algorithm
C.T. Lenard	73	Laguerre's iteration and the method of traces for eigenproblems
A. Bayliss and B.J. Matkowsky	75	Spinning cellular flames
M.A. Noor and A.K. Khalifa	81	Quintic splines method for solving contact problems
F.A. Al-Thukair and M.A. Noor	85	Complementarity problems in semi-inner product spaces

M.J. Panik	89	Farkas' theorem under convex combination
B. Pourbabai	91	A class of chance constrained network optimization problems
R. Rach and A. Baghdasarian	101	On approximate solution of a nonlinear differential equation
A.G. Ramm and G.Q. Xie	103	Uniqueness result for inverse problem of geophysics II
P. Prasad and R. Ravindran	107	A new theory of shock dynamics - Part II: numerical solution
P.K. Sahoo	111	Circularly symmetric separable functions are Gaussian
G.P. Samanta	115	Fluctuation and stability in a diffusive predator-prey system
G.P. Samanta and C.G. Chakrabarti	119	On stability and fluctuation in Gompertzian and logistic growth models
A.-M. Wazwaz	123	A modified third-order Runge-Kutta method
B. Wendroff	127	Cooperation in a three-way arms race
M. Zak	131	Weakly connected neural nets

NUMBER 4

J.J.A.M. Brands	1	Asymptotics of a certain integral
B.N. Mandal and P.K. Kundu	5	A note on the reflection coefficient in a water scattering problem
L. Jódar	9	Explicit solutions of Riccati equations appearing in differential games
P.R. Parthasarathy and N. Balakrishnan	13	A continued fraction approximation of the modified Bessel function $I_1(t)$
G. Caginalp and G.B. Ermentrout	17	A kinetic thermodynamics approach to the psychology of fluctuations in financial markets
A. Shidfar and A.A. Sadeghi	21	On the periodic solutions of certain nonlinear oscillators
G. Stengle	25	Numerical methods for systems with measurable coefficients
B.R. Feiring	31	Some properties of matrices from certain binary mathematical programming problems

A. Repaci	35	Nonlinear dynamical systems: On the accuracy of Adomian's decomposition method
A.G. Ramm	41	Uniqueness theorems for 3D inverse problems with incomplete data
P.C. Dauby and G. Lebon	45	Constitutive equations of rheological materials: Towards a thermodynamic unified approach
A.S. Abd El-Rady	49	Modification to the Friedrichs integral inequality
G.A. Kriegsmann and C.L. Scandrett	51	Decoupling approximations for structural acoustic interactions
J.-Q. Hu and S.G. Strickland	55	Strong consistency of sample path derivative estimates
I.M. Gamba	59	Behavior of the potential at the pn-junction for a model in semiconductor theory
R. Bru and R. Fuster	65	Parallel chaotic extrapolated Jacobi method
S. Mittnik	71	Modeling nonlinear processes with generalized autoregressions
J. Hofbauer and K. Sigmund	75	Adaptive dynamics and evolutionary stability
F. Lara-Ochoa and V.P. Bustos	81	Conflicting density dependent dynamics of a bacterial population
